

Medical Electronics – Hi-Technology at the Cutting Edge

The IEE Cambridge 2004 Seminar

Dr Bill Mason
Sage Healthcare Limited

Dr Stuart Hendry
Sphere Medical Ltd

Dr Tony Flint
Thermocore Medical Systems

Dr Ian Wilding
Pharmaceutical Profiles

Richard Traherne
Cambridge Consultants Ltd

Dr Vincent Wallace
Teraview Ltd

Rod Ruston
Priory Analysts Ltd

Dr Gilbert Park
Addenbrookes NHS Trust

Keynote Address – Present
Realities and Future Trends in
Medical Electronics and
Medical Technology

Microsensors for Clinical
Diagnostics

Targeting Heart Attacks – The
Electronic System that Detects
the Temperature of Your
Arteries

The Oral Magic Bullet: remote
controlled micro-electronic
capsules for delivering drug at
the right place at the right time

Wireless Trends in Healthcare

Biomedical Applications of
Terahertz Technology

Regulatory Approval: The Icing
on the Cake

The Doctor's Perspective: Am I
Getting What My Critically Ill
Patients Want From Hi-Tech
Equipment Manufacturers?

University of Cambridge Computer Laboratory – 2nd December 2004

“**Medical Electronics – Hi Technology at the Cutting Edge**” is a one-day seminar organised by the Cambridge Branch of the Institution of Electrical Engineers, as a service to its members and local technology businesses. The seminar is an opportunity to learn about and discuss what is happening in the medical electronics world. Coffee, a buffet lunch and afternoon tea are provided. The cost is £50 for IEE members, or £80 for non-members (some concessions apply). The seminar is open to all professionals, students, academics and members of engineering institutions.
